

Krieghoff Optima Drilling - Trigger and Selector Options

Traditional Drilling layout is shotgun barrels right and left with rifle barrel underneath.

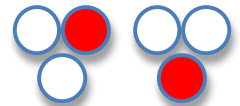

Alternative layout is Double Rifle Drilling with rifle barrels right and left and shotgun underneath

Krieghoff Drillings are provided with a selector on the top strap.

This selector features a pictogram showing which barrel will be fired by the front trigger. The options are TOP RIGHT BARREL or UNDER BARREL.

Double Trigger (Standard Trigger Configuration):

Selector in REAR position Front Trigger fires RIGHT Shotgun barrel.

OR

Selector in FORWARD position the Front Trigger fires the Under RIFLE barrel.

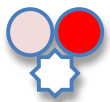

Rear Trigger fires LEFT Shotgun barrel only.

The FRONT Trigger can be pushed forward to act as a "Hair" Trigger with a very light trigger pressure when firing the Rifle barrel or for use with an insert tube in the Right barrel.

A "Hair" Trigger can be optionally specified for the Rear Trigger for use with a tube insert in the Left barrel.

Krieghoff 'One-Two' Trigger:

Selector in REAR position Front Trigger acts as a Single Trigger and will fire first the RIGHT barrel and then the LEFT barrel.

OR

Selector in FORWARD position the Front Trigger fires the RIFLE barrel only.

The FRONT Trigger can be pushed forward to act as a "Hair" Trigger with a very light trigger pressure when firing the Rifle barrel or for use with an insert tube in the Right barrel.

Rear Trigger fires LEFT Shotgun barrel only.

A "Hair" Trigger can be optionally specified for the Rear Trigger for use with a tube insert in the Left barrel.

Krieghoff 'One-Two Custom' Trigger:

Only available on Double Rifle Drillings built on the 20 bore action frame.
No Selector is required with this trigger system.

Front Trigger fires RIGHT and then LEFT Upper Rifle barrels.

The FRONT Trigger can be pushed forward to act as a "Set" Trigger for the RIGHT barrel only.

Rear trigger fires UNDER Shotgun barrel.

A "Hair" Trigger can be optionally specified for the REAR Trigger for use with a tube insert in the Under Shotgun barrel.

Krieghoff Single Trigger: (Optional)

Selector in REAR position Single Trigger will fire first the RIGHT barrel and then the LEFT barrel.

Selector in FORWARD position: Single Trigger operates Under Rifle Barrel first and then the LEFT Upper Barrel
