# COMPETITION SHOTGUNS

“Welcome to  
the team.”

# THE NEW KRIEGHOFF

Not many family-owned companies can look back on a history of five generations. What our ancestors started in 1886 continues to evolve. Our passion for hunting and technical perfection is what creates and reinforces the bonds between the generations. It continues to this day.

# STEPS TO SUCCESS. COMPETENCE. EXPERIENCE.

## MILESTONES IN THE HISTORY OF THE KRIEGHOFF COMPANY

1900

„Die Läufe schießen – der Schaft trifft“ – (You shoot with the barrel, you hit with the stock) – Ludwig Krieghoff's maxim led to his patented custom stock method.

1905

Kriehoff's first adjustable insert barrel is patented.

1906

A pneumatic device to prevent "doubling" on drillings with a single trigger is presented.

1925

Kriehoff introduces lightweight Dural as a gunmaking material.

1926

The first over-and-under combination rifle/shotgun with manual cocking and de-cocking slide appears in the Krieghoff catalog.

1930

Kriehoff manufactures the world's first lugless shotgun. The elegant shape and low receiver are extremely impressive.

1932

Kriehoff's semi-automatic rifle with gas-operated loading mechanism and block action debuts.

1956

Patent for a safety catch for breech-action guns.

1960

Patent for a lock with manual cocking system and cocking slide.

1967

Patent for free-floating barrels for combination guns

1968

Patent for a single trigger for multibarrel guns.

1982

Patented Krieghoff scope mount

1992

Kriehoff's Combi-Cocking Device and automatic hair trigger release are introduced and patented.

1992

The Universal Trigger System is patented.

1996

The muzzle adjustment with an adjustment wedge is patented.

2002

Optimized Krieghoff Optima Combi-Cocking device is granted a utility patent.

2007

Kriehoff's patented in-line repeating system sets new benchmarks for repeating rifles.

2012

Introduction of the Pacours line for K-80 and K-20

# TRADITION. INNOVATION.

Our founder Ludwig Krieghoff was already a pioneer in his day. His insight that "you shoot with the barrel, you hit with the stock" („Die Läufe schießen – der Schaft trifft“) anchors our manufacturing tradition and forms the basis for the patented Krieghoff custom stock-fitting method. The unbridled creative force that drives all Krieghoff generations enabled milestones that have made the company what it is today: a manufacturer of rifles and shotguns made with passion.

Heinrich Krieghoff presents the new K-32 in Triest.

Early key players: Hal du Pont, Nick Maynard, Viktor Brandl, H.-U. Krieghoff (l to r)

Don Haidemann wins Olympic gold in Montreal in 1976 with his K-32.

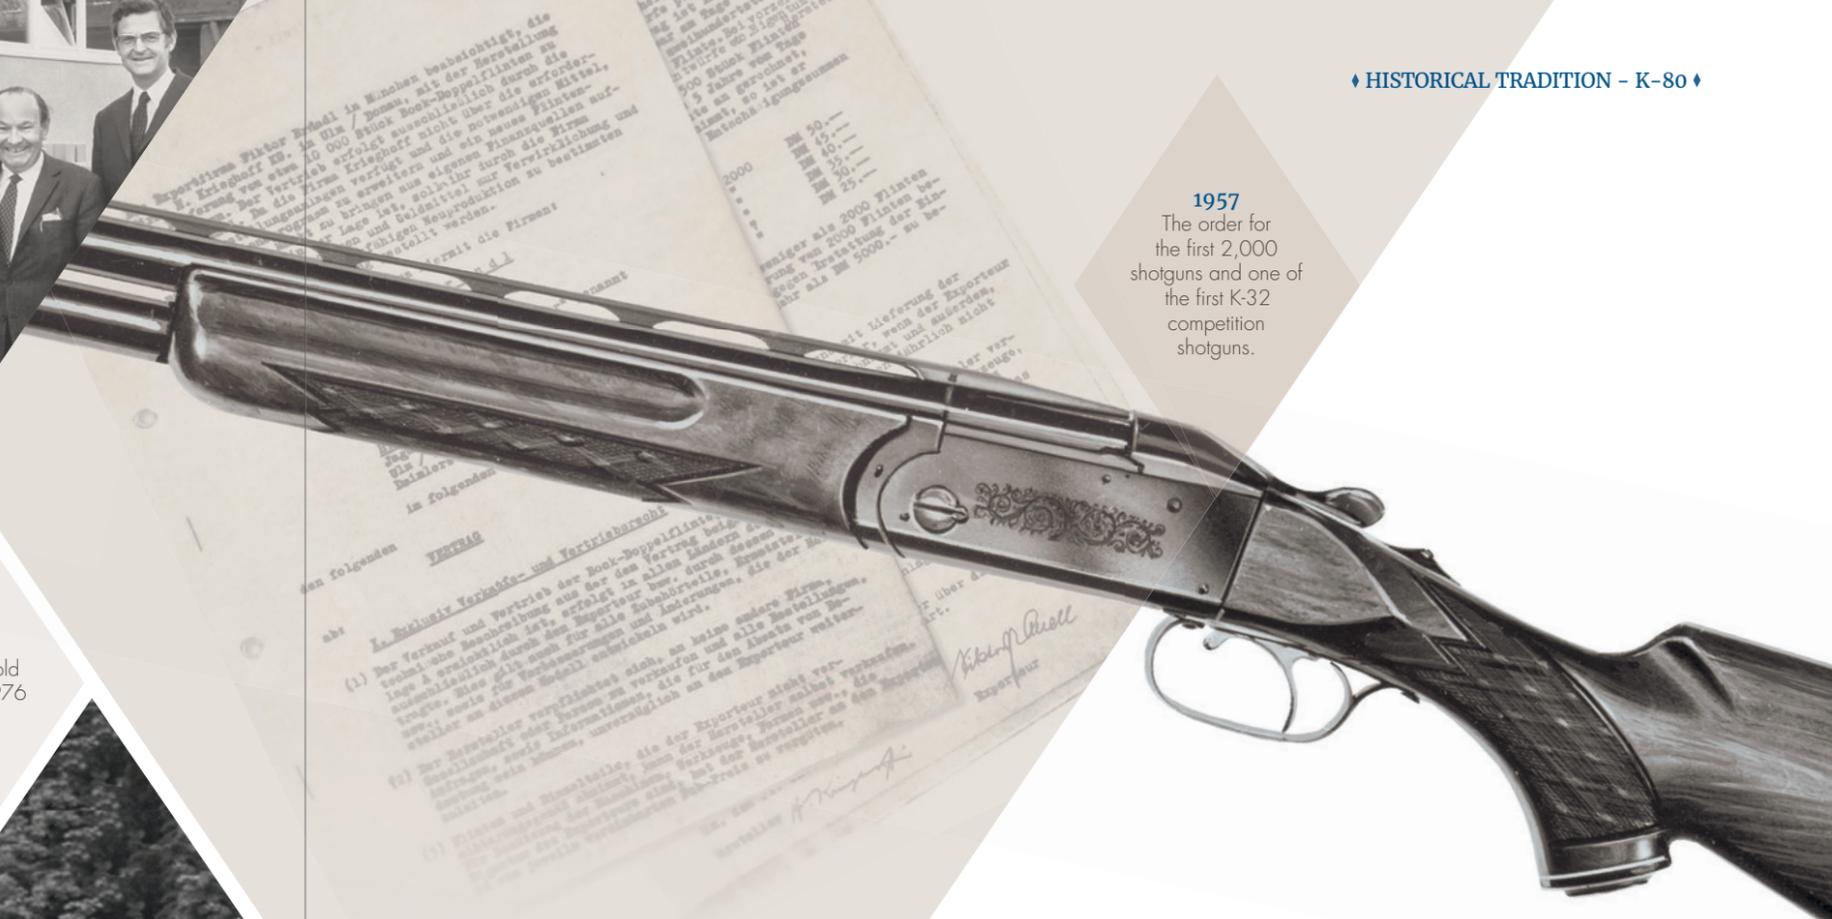

Kenneth Jones visits the Krieghoff factory in Ulm in 1966 after winning the world trapshooting championship with his K-32.

Kay Ohye, legendary trap shooter and important source of inspiration for the enhancement of the K-80.

Left to right.: Jim Poindexter and Heinz-Ulrich Krieghoff in 1972 in the US.

1957  
The order for the first 2,000 shotguns and one of the first K-32 competition shotguns.

# K-80: A SUCCESS STORY

The legendary reputation of the K-80 is no coincidence. It is based on decades of continuous optimization of the very first shotgun made by Krieghoff – the K-32. In the 1930s, Remington had developed its model 32, a true competition shotgun. However, the company stopped manufacturing this complex firearm shortly after it was introduced. In the end, it was L. M. Donaldson, winner of several trapshooting championships in the United States, who traveled to Germany bringing the idea of a perfect competition shotgun with him. In Krieghoff, he found the expert gunsmith he'd sought for so long. The basic design of the Remington 32 was now used as the starting point for the Ulm-based gunmakers' shotgun project. The lively exchange of ideas and experience with Krieghoff shooters intensified after Dieter Krieghoff emigrated to North America in 1979 and founded Krieghoff International Inc. This dialogue led to the development of the K-80, an enhanced version of the K-32.

# THE MODULAR SYSTEM

To this day, the concept of the Krieghoff competition shotguns is based on the optimal adaptation of the firearm to the individual requirements of the shooter and of the chosen discipline. The principle of interchangeability and modular systems make this possible.

## CHOKES

Conventional fixed chokes or choke tubes are optional for every K-80. The knurled and clearly marked choke tubes can easily be replaced in a flash. Titanium choke tubes are also available as an option. Ten inserts, from Cylinder to Super Full, are available for all choke tube sets. Thin-walled Briley screw-in chokes are optional available.

## ACTION

The K-80 breech has developed a reputation for being indestructible. That's no coincidence: it is a fact that many of these shotguns have easily been able to fire over a million rounds. Since the action locks without a bottom bite, the receiver design can be shallow. The hinge is very far forward and high, which maintains the leverage generated by firing. The breech plate design is self-adjusting and forms a large, very rugged locking area. The breech lever is positioned to ensure optimal ergonomics. Thus, minimal effort is required to open the breech.

## STOCKS

Optimally designed stocks are available for the K-80 to suit each type of sporting event and to meet the shooters' needs. The adjustable comb stock can be easily modified to suit individual requirements. It goes without saying that custom stocks can also be ordered very easily. An intuitive and repeatable fit are the priorities when creating the stock components. Krieghoff takes this fact into account, offering the pistol grip's palm swell that provides a particularly firm and comfortable handling of the gun. The fine checkering adds to the secure, safe grip. All guns are available with right- and left-handed stocks.

## BARRELS

Barrels are offered in standard lengths: 71 cm, 76 cm and 81 cm (28", 30", 32"). The point of impact can be easily adjusted between the free floating barrels. An exception to this is the K-80 Parcours, which has a hard-soldered barrel set. All points of contact on the barrel set are hard-soldered to maximize durability and service life. The chambers are chromed to maximize their life and the long forcing cone reduces the recoil felt by the shooter. The inside profile of the barrel ensures an even pattern and maximizes the speed of the shot column. All 12 gauge and 20 gauge screw-in choke versions of the K-80 and K-20, including the fixed choke versions, which meet the necessary requirements, are steel shot proved.

# MEETING THE HIGHEST STANDARDS

Krieghoff shotguns are synonymous with quality and durability. Only meticulously selected materials are used. Those who wish to expand the functionality of their Krieghoff gun with interchangeable barrels can choose from a wide range of barrel sets.

Information about barrel sets and options can be found on pages 66–67.

*“Your aspiration is our motivation.”*

*“Feel the  
genuine passion.”*

## PERFECTION LEADS TO PRECISION

Ludwig Krieghoff's maxim "you shoot with the barrel, you hit with the stock" („Die Läufe schießen – der Schaft trifft®") is just as true today as it was in the past and hits the mark particularly when shooting with shotguns. Regardless of whether you choose a standard or customized stock design, our stock makers use the proven Krieghoff stock-fitting process to custom fit K-80 stocks for each individual shooter. Together with the craftsmanship of the stock maker, this process shapes the superb stock that seems to fit right out of the box. Our stock inventory includes a large number of stock blanks in a wide range of quality classes. Each stock is one of a kind!

Detailed information about stocks can be found on pages 64–65.

# ENGRAVINGS AND FINISHING

Engravings give each shotgun their own unique look. Flawless craftsmanship and exquisite artistry adorn the receivers with unique objects and one-of-a-kind works of art. The Krieghoff engravers have a comprehensive repertoire ranging from deep relief to the finest Bulino engraving, encompassing everything from classic hunting scenes to the intricate ornamentation of various eras.

*“Transform your shotgun into an expression of your personality with your personal selection of a catalog or custom engraving.”*

More information on engraving and finishing options can be found on pages 50–61.

# KRIEGHOFF AROUND THE GLOBE - A WINNING STREAK

On the winner's podium with Krieghoff: Around the globe, renowned target shooters and Olympic champions in target shooting including Corey Cogdell-Unrein (USA), Morgan Craft (USA) and Federico Gil (Argentina) put their trust in sporting shotguns made in Ulm. Our goal: to optimize your performance. Personal experience and the intensive collaboration with sporting shooters from all over the world are the drivers behind the dynamic ongoing development of this successful competition shotgun.

Corey Cogdell-Unrein has already won the gold medal in several World Cups as well as bronze in Peking and Rio.

Rebecka Bergkvist FITASC world champion and vice world champion

Inna Alexandrova is a multiple FITASC world champion

Paul Chaplow Multiple European, British, English, Scottish, Welsh DTL Shooting Champion

Gebben Miles FITASC world champion and winner of multiple national and international titles.

# K-80: THE LEGEND

To achieve the perfect sight picture for every sporting discipline, Krieghoff offers a wide variety of barrel sets with perfectly matched ribs. Together with the appropriate stock design, the right version of K-80 is created for your discipline.

K-80 barrel sets are available in gauges 12, 20, 28 and .410.

K-80 ProTrap

K-80 barrel sets are offered in standard lengths: 71 cm (28"), 76 cm (30"), and 81 cm (32"). Combined with a wide range of ribs, the K-80 becomes the perfect gun for every discipline.

Barrel set options can be found on pages 66–67.

Fixed chokes and choke tubes

00	C	Cylinder	0.00 mm
0	S	Skeet	0.13 mm

3	IM	3/4 choke	0.76 mm
4	F	Full	0.89 mm
5	SF	Super-Full	1.02 mm

## AREAS OF USE FOR THE K-80

### SPORTING CLAYS

The modular design of the K-80 makes it the ideal competition shotgun. Thanks to a comprehensive range of optimally designed forearms and stocks, four standard barrel lengths, and fixed as well as adjustable ribs, the K-80 can be easily and optimally adapted to the requirements of every discipline.

### HUNTING

The incredible performance of the K-80 is equivalent to a revolution that enhances success not only at the range but on every hunt as well. Its unique handling and balance make the K-80 a reliable and durable companion on your hunts.

- ### K-80 STANDARD EQUIPMENT WITH FIXED CHOKES AND CHOKE TUBES OPTION
- Nickel-plated steel receiver
  - Blued hinge screw, latch, screws and dowels
  - Selective single trigger with mechanical selector, length adjustable
  - Standard engraving: "Arabesques"
  - Standard wood category
  - Adjustable comb
  - Supplied in a Premium GunPack

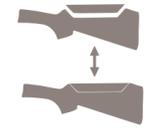

The choke tubes option also includes the following features

- Knurled factory chokes including five screw-in chokes made of steel and choke key

### K-80

Optimization for the respective discipline and perfect adaptation to individual requirements are part of the Krieghoff K-80 concept from the very beginning.

**Figure:** K-80 ProTrap, Barrel length: 81 cm (32"), Krieghoff Titanium Choke tubes, Catalog engraving: "Heritage Game Scene II", trap forearm, ProTrap stock, Wood category C1.

Standard grade walnut burl and seven optional wood upgrades available

Optimally designed stocks are available for the K-80 to suit each type of sporting event. The adjustable comb stock can be easily modified to suit individual requirements.

It goes without saying that custom stocks can also be ordered very easily.

Different types of stocks are shown on pages 64–65.

With the lock up located on the top of the barrels and auto-adjusting top latch, the K-80 system has a reputation of being practically indestructible.

Choose your preferred catalog engraving or have our engravers use your own design.

Inspiration for custom engravings can be found on pages 50–61.

K-80 Trap

K-80 Trap Special

K-80 ProTrap

# TRAP

Trap is one of the oldest shooting disciplines and is internationally popular among competitive shooters. Trapshooting has been an Olympic discipline since 1900. Due to its features and adaptability, the K-80 is virtually predestined for these types of sports.

## K-80 TRAP

Barrel length: 76 cm or 81 cm (30" or 32");  
12 mm taper step rib, soldered;  
Righthanded Trap Monte Carlo stock;  
Trap forearm with slanted end.  
Optional 86cm Unsingle barrel.  
Weight: approx. 4,120 g

## K-80 TRAP SPECIAL

Barrel length: 76 cm or 81 cm (30" or 32");  
Optional 86 cm (34") Single Barrel;  
Rib: "Trap Special"  
10 mm tapered (12 mm with bevel),  
adjustable, highest selectable  
shot pattern: 100% (optional "Pro" rib  
with 120% high pattern; Righthanded  
"Trap Special Rollover" stock;  
Trap forearm with slanted end.  
Weight: approx. 4,310 g

## K-80 PROTRAP

Barrel length: 76 cm or 81 cm (30" or 32");  
Optional 86 cm (34") Unsingle barrel;  
Rib: 10 mm tapered (12 mm with bevel),  
adjustable, highest selectable  
shot pattern: 70/30%;  
Righthanded "ProTrap" stock;  
"Trap" forearm with slanted end.  
Weight: approx. 4,070 g

# SPORTING

Ambitious, demanding sport shooters know why they value the Krieghoff K-80. From muzzle to pad, this sporting shotgun is designed to compete: absolutely uncompromising in reliability, durability and flexibility.

K-80 Sporting

"ProSporter"

# SKEET

Skeet shooting requires quick target acquisition and a wide swing profile. Competitive skeet shooting has been an Olympic discipline since 1968. Its exquisite balance and multiple gauge barrel options make the K-80 Skeet the competitive shotgun of choice.

**Figures:**

In comparison: Top Image: the free-floating barrel set of the K-80 with choke tubes.  
Bottom: The elegant soldered barrel set of the K-80 Parcours with fixed chokes

## K-80 SKEET

Barrel length: 71, 76 or 81 cm (28", 30" or 32"); Screw-in chokes;  
Rib: 10 mm taper flat, soldered;  
Righthanded „Sporting“ stock;  
Sporting forearm with slanted “Schnabel” end.  
Weight: approx. 3,980 g

## K-80 PARCOURS

Barrel length: 71\*, 76 or 81 cm (28"\*, 30" or 32"); Fixed chokes;  
Rib: 8 mm taper flat, completely soldered barrel set;  
Righthanded “Parcours” stock, “Parcours” forearm, slanted, with epoxy stock finish and adjustable comb.  
Weight: approx. 3,620 g

\*Available only with Briley screw-in chokes

## “I’LL NEVER PART WITH IT!”

Five years ago, I decided to purchase a K-80 from Krieghoff and I’ve never regretted my choice once. Its handling and feeling have become so dear to me in the meantime that I can’t even imagine shooting with a different gun. Moreover, Krieghoff provides fantastic service and has a unique, family-style flair that always makes me feel like I’m exactly in the right place, over and over again. With my trusty K-80 I’ve really been able to develop my skills and have won numerous international titles and even set a record in Rio in 2016.

Andreas Löw

## A PASSION FOR QUALITY

The right shotgun for every situation: Krieghoff is not merely a manufacturer of hunting firearms and competition shotguns, but a mindset and a lifestyle. Since 1886, Krieghoff has been synonymous with tremendous innovative drive paired with the expertise and reliability of a company rich in tradition and history.

8 K-20

**K-20 SPORTING**

Streamlined shotgun for use in clay target sports or wingshooting

Figure:  
Barrel length: 81 cm (32"), taper flat rib,  
„Factory“ choke tubes,  
Schnabel forearm, sporting stock  
Catalog engraving “Highland game II”  
Receiver: Nitride finish,  
wood category 3; stock finish: epoxy

**K-20 PRO SPORTER**

The sportiest K-20, with a high, adjustable rib and comb

Figure:  
Barrel length: 81 cm (32"), “ProSporter” rib  
Choke tubes: factory chokes, Schnabel forearm  
ProSporter stock with adjustable comb,  
standard engraving “Vintage game 3”, nitride finish,  
wood category 4, gold-plated trigger, stock finish: epoxy

Barrel sets available:  
76 and 81 cm (30" and 32")

**K-20 PARCOURS**

Lean and light, thanks to the classic soldered barrel set.

Figure:  
Barrel length: 76 cm (30"),  
taper flat rib, Choke tubes:  
Briley chokes; Schnabel  
forearm, Sporting stock,  
Catalog engraving:  
“Sovereign Scroll”,  
Nitride finish;  
wood category 1;  
stock finish: oil

K-20 Parcours is available in 20 & 28 gauges. The .410 option is available for Sporting and ProSporter models

Choke tubes are available in the Sporting and ProSporter models.

**AREAS OF USE FOR THE K-20**

**HUNTING**

The K-20 offers the same superior performance as its big sister, incorporating all of the technical highlights in a slimmer, lighter form, with excellent balance and handling.

**SPORTING CLAYS**

Powerful and durable. Not only the resilient receiver with its exceptional trigger, but the versatility in configuring the gun to your personal preferences make the K-20 the ideal competition shotgun.

**K-20:  
THE ELEGANT  
ALLROUNDER**

The K-20 is a true Krieghoff in every respect. All features of the legendary K-80 action have been incorporated in the K-20 as well, adapted only for the different gauge. The outside dimensions of the receiver have been scaled accordingly, resulting in a fascinatingly lean shape and the excellent balance of the shotgun. Whether it be for sporting clays, skeet or in field, the K-20 shines.

The streamlined little sister of the K-80: its receiver includes all of the features of its iconic model.

Choose your preferred catalog engraving or have our engravers use your own design.

Inspiration for custom engravings can be found on pages 50–61.

Standard grade walnut burl and seven optional wood upgrades available

Naturally, custom stock fitting is always available.

**K-20 STANDARD EQUIPMENT**

- Five choke tubes with knurled ends and choke wrench are included with K-20 Choke tube models
- Hinge screw, top latch, screws and pins are blued
- Steel receiver with nickel finish
- Mechanical single trigger, adjustable-length trigger blade
- Standard engraving: “Tasteful arabesques”
- Standard grade wood
- Delivered in a gun case
- K-20 is available in the gauges 20, 28, .410

„ProSporter“ rib, tapered, adjustable, .410 gauge, barrel lengths: 76 cm and 81 cm (30" and 32"), with factory chokes

„ProSporter“ rib, tapered, adjustable, 28 gauge, barrel lengths: 76 cm and 81 cm (30" and 32"), with factory chokes

„Sporting“ rib, taper flat, soldered, .410 gauge, barrel lengths: 76 cm and 81 cm (30" and 32"), with factory chokes

„Sporting“ rib, taper step, soldered, 28 gauge, barrel lengths: 76 cm and 81 cm (30" and 32"), with factory chokes

## GRACEFUL YET STRONG

The "twenty" is considered by many to be uniquely fascinating in its own right. Lean and light, it does not take a back seat in performance to any of the typical 12-gauge shotguns. In the "Sporting" version, the K-20 shotgun with its free-floating barrels is optimized for skeet and hunting. In the "ProSporter" version, the lean over-and-under competition shotgun with a higher, adjustable line of sight and a stock with a likewise adjustable comb offers maximum flexibility for sporting use.

### K-20 SPORTING

Rib: 10 mm taper flat, non-adjustable; free-floating barrel set; straight "Sporting" stock, not adjustable; non-adjustable, stock finish: epoxy; "Sporting" forearm with straight end. Weight: approx. 3,500 g

### K-20 PRO SPORTER

Rib: 10 mm tapered (12 mm with bevel), adjustable, highest select. shot pattern: 70/30%; free-floating barrel set; right-handed ProSporter stock with adjustable comb; stock finish: epoxy; "SportingSchnabel" forearm. Weight: approx. 3,690 g

# BY TRADITION ONE OF THE BEST

Whether lightning-fast grouse in England, doves in Argentina, majestic pheasants in South Dakota or red-legged partridges in Spain, a reliable shotgun is a must for exclusive small game hunting of this kind. The perfect choice: the new K-20 Parcours. The key to success is first and foremost the intuitive mount. Everything else follows naturally. Your instinct aims - the K-20 Parcours hits. As shooting is a fast sport that happens on the move, balance is essential in a shotgun. The soldered barrel set and the streamlined form gives the K-20 Parcours excellent balance. The shooter and the gun merge into one with this configuration.

## NO COMPROMISES

The K-20 is a true paragon of elegance and longevity. With its technical features, it holds its own with the K-80. The external dimensions of the receiver are sleek and elegant. Light and lean with beautiful handling, it is the ideal companion for every hunter and sport shooter. An authentic Krieghoff!

## K-20 PARCOURS WITH FIXED CHO- KES

Barrel length: 76 or 81 cm (30" or 32"); Rib: 7 mm taper flat, completely soldered barrel set; right-handed "Parcours" stock, not adjustable; stock finish: oil. Alternative: With epoxy finish and adjustable comb; "Parcours" forearm, slanted. Weight: approx. 3.180 g

# “ONCE A KRIEGHOFF, ALWAYS A KRIEGHOFF.”

My name is Kevin DeMichiel. My father introduced me to shooting when I was very young. In 2009 I made a switch to a Krieghoff K-80 ProSporter. Since then I have won several national titles and achieved international success as well. Since I'm also a passionate hunter and wanted to use a lighter gun on bird hunts that gives me the same great feeling as my K-80, it was clear that I had to have a K-20 Parcours. This little beauty, now accompanies me on every duck hunt and never lets me down.

*K. DeMichiel*

Kevin DeMichiel

## ENGRAVING CATALOG

Engravings transform sport shotguns into works of art and lend them an incomparably beautiful appearance. Krieghoff offers a large selection of "catalog" engraving motifs, encompassing a wide variety of artistic design options. Transform your K-80 or K-20 into your own unique competition gun.

Catalog engraving:  
"Parcours Special"

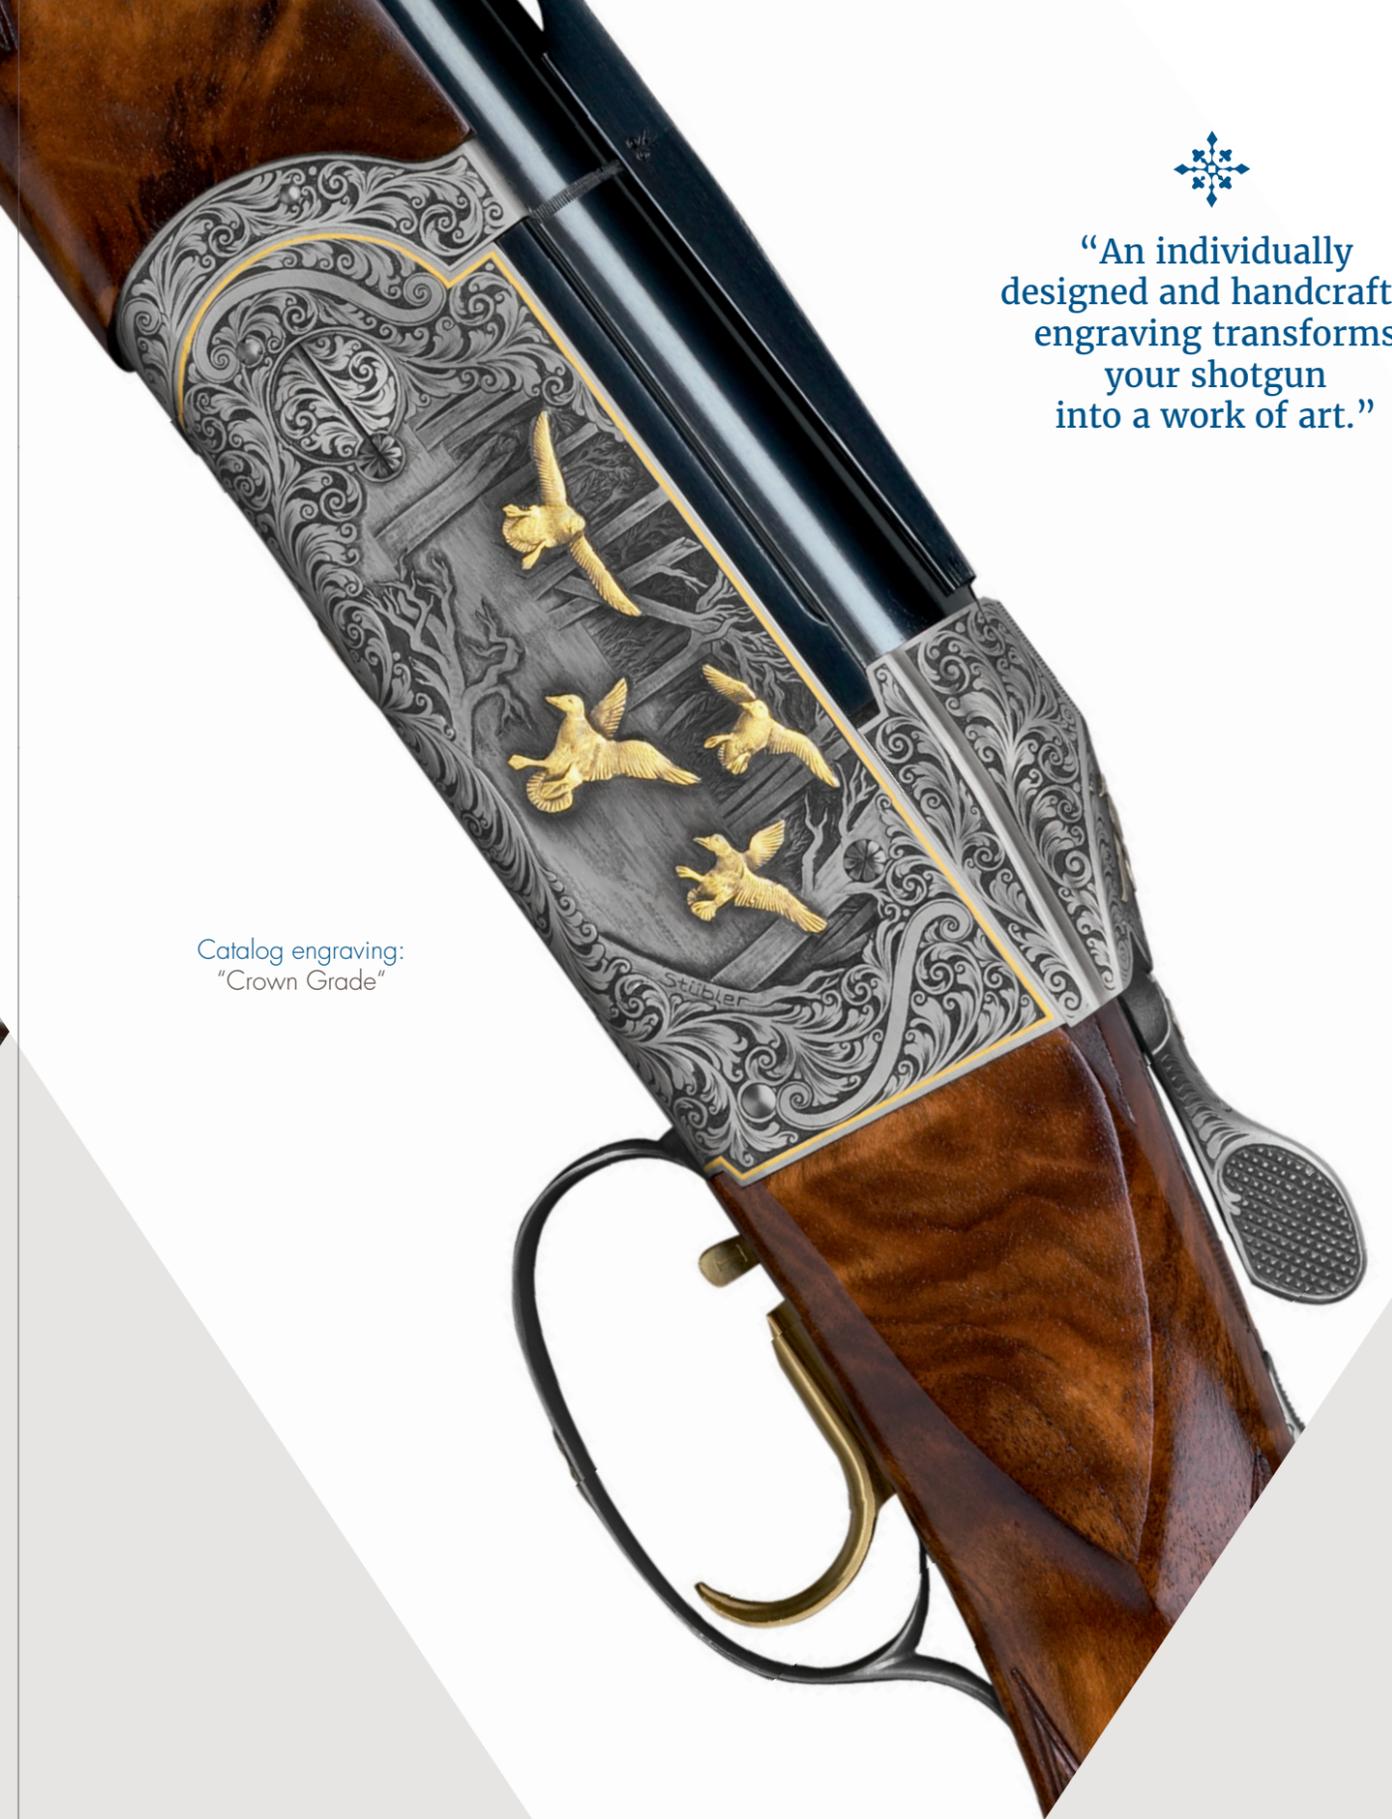

Catalog engraving:  
"Suhl Scroll"

Catalog engraving:  
"Sovereign Scroll"

Catalog engraving:  
"Plantation Scroll"

Catalog engraving:  
"Crown Grade"

"An individually  
designed and handcrafted  
engraving transforms  
your shotgun  
into a work of art."

Catalog engraving:  
"Renaissance"

Catalog engraving:  
"Eleganza"

Catalog engraving:  
"Rausch Scroll"

"There is an extremely wide range of options for your engraving. Let your creativity run wild!"

# CUSTOM ENGRAVINGS

Custom engravings are the result of sophisticated craftsmanship and expertise, individually designed in accordance with your wishes. Krieghoff offers a wide range of ornate, extremely detailed and beautifully executed motifs that leave nothing to be desired. Each engraving is unique.

### Custom engraving:

This example illustrates the fine art of engraving. The individual objects are portrayed with great detail and delicacy. The receiver's right side shows how Cody earned his famous moniker. The receiver's left side shows Buffalo Bill riding into the middle of his Wild West Show proudly bearing the American flag, symbolizing his deep patriotism. The Buffalo nickel is engraved on the hinge pins, showing a Native American on one side and a buffalo on the other.

The bottom of the receiver shows the classic showman pose Buffalo Bill was famous for. Engraved on the top latch is the Medal of Honor awarded to Buffalo Bill for his work as a civilian scout during the Civil War. The dates of his birth and death adorn the trigger guard.

Custom engraving:  
"Elements of Time"

The "Elements of Time" engraving features exquisite detail accompanied by brilliant enamel and inlaid precious gems, making this work of art "timeless". Creative Art is known for their extensive artistic and compositional talents.

Custom engraving:  
"Arabic Ornament"

Inspired by Arab architecture, this unique engraving was designed with fine, inlaid gold lines and whimsical symmetry.

Custom engraving:  
"Fantasy Dragon"

Extensive black-leaf ornamental design in which mystical dragons are artistically incorporated.

Custom engraving:  
"Custom Waterfowl"

with gold inlays, very detailed scenes with waterfowl integrated in a floral ornament with English arabesques.

Custom engraving:  
"Terra Australis"

The Gun of the Year 2016 was dedicated to the mysterious continent of Australia: "Terra Australis".

Custom engraving:  
"Custom Floral"

Powerfully engraved floral ornamentation combined with fine floral accents inlaid in gold and silver.

Custom engraving:  
"Winter"

Portraying the winter season was a huge challenge for our engravers.

The snowy and icy surfaces were created with white gold.

The flying ducks were done in red and green gold.

Custom engraving:  
"Leonardo da Vinci"

The brilliant mind of Leonardo da Vinci produced legendary artwork captured here on the K-80. Fine Bulino engraving captures the detail of da Vinci's work while the deeper Renaissance scroll provides the perfect frame.

“You can place absolute trust  
in the reliability and perfection  
in every situation.”

# THE HUMAN FACTOR: STOCK CONFIGURATIONS FOR INDIVIDUALS

When it comes to ergonomics, a shotgun's stock is a key component. Every K-80 is equipped with a stock optimized for the relevant discipline, enabling flawless adaptation to the individual requirements of each shooter.

## THE KRIEGHOFF BALANCE SYSTEM

The perfect balance of the Krieghoff competition shotguns can be individually adapted to the shooter, thanks to the "Krieghoff Balance System". With the sophisticated system of new barrel and stock weights, the K-80 and the K-20 can be optimally balanced. The barrel is thereby equipped with up to three additional weights of 40 g each underneath the forearm.

Figure:

The adjustable comb can be moved 15 mm upwards and shifted by 5 mm to the left or right as required by the shooter.

The adjustable butt plate enables you to simultaneously adjust the pitch, drop, toe/heel and cast.

Right- and left-handed stocks of the K-80 "ProSporter"

Figure:

The butt stock can be equipped with a special stock bolt, which is 40 g heavier than a standard stock bolt, and can accept up to five additional 30 g weights. So, the weight of the stock can be increased up to 190 g.

# PERFORMANCE AND FLEXIBILITY

The barrel set options for the K-80 make it possible to optimize the configuration for a wide variety of disciplines and to adapt the gun to suit individual preferences.

The choke systems for the K-80: blued "Factory" chokes (steel); titanium chokes: titanium-colored, gold-plated and black-coated. Also available: Briley flush-fitted screw-in and extended chokes.

"Sporting" barrel set / 12, 20, 28 and .410 gauge / Barrel lengths: 71, 76, 81 cm (28", 30", 32") / Rib: 10 mm taper flat, soldered

"ProSporter" / 12, 20, 28, and .410 gauge / Barrel lengths: 76, 81 cm (30", 32") / Rib: 10 mm tapered (12 mm with bevel), adjustable, highest selectable shot pattern 70 / 30%

"Trap" barrel set / 12 gauge / Barrel lengths: 76, 81 cm (30", 32") / Rib: 12 mm taper step, soldered

"Trap Special" barrel set / 12 gauge / Barrel lengths: 76, 81 cm (30", 32") / Rib: "Trap Special" 10 mm tapered (12 mm with bevel), adjustable, highest selectable shot pattern 100% (alternative: "Pro" rib with 120% high pattern)

## MAINTENANCE SERVICE

Regular maintenance of your quality products from Krieghoff ensures that you can rely 100% on the reliability and safety of your gun even after many years of use. You'll find detailed information on our website at: [www.krieghoff.de/maintenance-service](http://www.krieghoff.de/maintenance-service)

COMPETITION GUNS  
WITH INNOVATIVE  
TECHNOLOGY

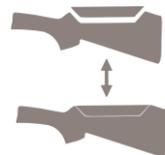

The original Krieghoff  
gun service

# SHOTGUNS AS HEIRLOOMS

With the utmost care and flawless craftsmanship, Krieghoff produces shotguns to be passed down through generations – masterpieces that always retain their monumental value. As an integral part of our work, collaboration in a spirit of partnership is extremely important to us – and as with shooting, we are focused on a clear goal: optimally meeting the needs of our customers.

## HANDCRAFTED AND CUSTOMIZED STOCKS

A handcrafted stock is defined as a stock that has been manually produced to the largest extent (with only partial mechanical preprocessing), including the comb and/or forearm, from the original blank. Special wishes concerning the stock design (special stock shape, deviations from the standard length, etc.) generally require manual processing of the standard stock shape or a customized stock. In such cases, a personal fitting is essential. Our experienced stock makers ensure that your stock fits you perfectly, enabling you to confirm the truth in Ludwig Krieghoff's old saying: "You shoot with the barrel, you hit with the stock."

## ENGRAVING AND FINISHING

Transform your shotgun into an individual work of art. The clean surfaces and contours of the K-80 and K-20 offer a generously dimensioned design field for engravings of every style and manner of execution. The repertoire of catalog engravings shows the diversity of artistic options for enhancing the Krieghoff competition shotguns. Based on your design and ideas, our engravers can design and produce exclusive, one-of-a-kind pieces that will bring you timeless pleasure forever.

## INTERCHANGEABLE BARRELS

Our Factory Technicians are experts in precise barrel fits, insert barrel installation and adding interchangeable chokes to your barrel, as well as being knowledgeable about steel shot proofing. Government inspections will be arranged when required.

## K-80 AND K-32 MAINTENANCE SERVICE

Your wish is our command. In addition to first-class shotguns, we'd also like to offer you first-class service. This goes for the construction of your Krieghoff according to your own specifications, as well as for repairs, stock modifications, retrofitting your K-80 or K-20 with a component from our extensive product range, and much more.

# ALSO AVAILABLE FROM KRIEGHOFF: HUNTING GUNS

**PUBLICATION DETAILS**

We thank everyone who has helped to create this catalog. We continuously work to enhance our K-80 and K-20 competition shotguns. We therefore ask for your understanding when we advise that features and technical aspects may not be exactly as those shown in this catalog. Guns may be purchased only by those in possession of a valid firearm permit.
